

You are cordially invited to the official "ground and building breaking" ceremony for Phase I of the Mukilteo Lighthouse Park Project!!

**Mukilteo Lighthouse Park – Construction Staging Area
November 9, 2007 - 2:00 p.m.**

The Mukilteo Lighthouse Park project will provide needed recreation opportunities for residents and also support a multi-agency redevelopment effort underway from Mukilteo to Everett. Several local, state, and federal agencies are developing separate projects along the waterfront, and Lighthouse Park will enhance these efforts by providing improved recreation opportunities and other amenities that complement the planned redevelopment.

Improvements to this 13 acre site will follow four development phases. Phase one covers over four acres of the park and will include: open landscaped areas for passive recreation; sheltered picnic facilities; a children's play area; an interpretive program with displays and viewpoints; internal pathways; the first section of a waterfront promenade; a new restroom facility; and ADA access to the beach via a new parking and access area.

These improvements will transform the site from a (formerly) state-owned facility, to an urban park serving residents and area visitors arriving by ferry, car, train, bus, or bike. In addition to providing new and enhanced recreation opportunities for residents, the park will also provide a critical connection point to redevelopment efforts underway along the Mukilteo and Everett waterfronts.

Come join us as we celebrate progress in the City of Mukilteo!!

Mayor of Mukilteo
